|----------|-----------|-------------------|---------------------|------------------------|

ARKANSAS, Southeast

ASHLEY COUNTY --- 1.1 SSE WHITE [33.01, -91.99], 2.3 WNW BOYDELL [33.39, -91.51]

| | | |
|--------------------|----|-------------------------|
| 02/05/08 15:06 CST | 1M | Hail (2.75 in) |
| 02/05/08 15:53 CST | 0 | Source: Law Enforcement |

Significant hail storm occurred across a large portion of Ashley County as a large supercell thunderstorm tracked from just south of Crossett to just south of Hamburg and then to around Jerome. Golf ball sized hail was common and covered the ground all along the path. A few locations, mainly just south of Hamburg, the hail was as large as baseballs. This very large hail caused a great deal of damage to dozens of vehicle and roofs. The supercell continued to produce damaging hail as it moved past Jerome and across northern Chicot County.

ASHLEY COUNTY --- 4.1 E CROSSETT MUNI ARPT [33.17, -91.80]

| | | |
|--------------------|-----|------------------------------|
| 02/05/08 15:25 CST | 15K | Thunderstorm Wind (EG 63 kt) |
| 02/05/08 15:25 CST | 0 | Source: Law Enforcement |

A few trees and power lines were blown down just south of Hamburg.

ASHLEY COUNTY --- 2.0 SE HAMBURG [33.21, -91.80], 2.1 SE HAMBURG [33.21, -91.79]

| | | |
|--------------------|-----|--------------------------------------|
| 02/05/08 15:26 CST | 40K | Tornado (EF1, L: 0.62 mi , W: 50 yd) |
| 02/05/08 15:27 CST | 0 | Source: NWS Storm Survey |

This tornado began about one mile south of Hamburg and caused damage to the Junior High School. The damage consisted of a portion of the roof peeled back and several uprooted or snapped trees. Maximum winds were around 95 mph.

ASHLEY COUNTY --- 3.5 E HAMBURG [33.23, -91.76]

| | | |
|--------------------|-----|------------------------------|
| 02/05/08 15:30 CST | 12K | Thunderstorm Wind (EG 60 kt) |
| 02/05/08 15:30 CST | 0 | Source: Law Enforcement |

Several trees and a few power lines were blown down just east Hamburg.

ASHLEY COUNTY --- 1.4 WSW BOYDELL [33.36, -91.50]

| | | |
|--------------------|---|----------------|
| 02/05/08 15:53 CST | 0 | Funnel Cloud |
| 02/05/08 15:55 CST | 0 | Source: Public |

ASHLEY COUNTY --- 0.6 NNW BOYDELL [33.38, -91.48]

| | | |
|--------------------|---|------------------------------|
| 02/05/08 15:55 CST | 0 | Thunderstorm Wind (EG 55 kt) |
| 02/05/08 15:55 CST | 0 | Source: Law Enforcement |

A few trees were blown down along Highway 165.

CHICOT COUNTY --- 2.2 NE HALLEY JCT [33.55, -91.36], 1.3 NNW HUDSPETH [33.45, -91.46]

| | | |
|--------------------|-------|---------------------------|
| 02/05/08 15:55 CST | 0.60M | Hail (4.25 in) |
| 02/05/08 16:12 CST | 0 | Source: Emergency Manager |

A significant hail storm occurred across the northern portion of Chicot county as a large supercell thunderstorm tracked north-northeast. The hail moved into Chicot County from southeast Drew County between Jerome and Dermott and tracked to the Halley Community. Golf ball sized hail covered the ground along the path with baseball to softball sized hail stones being the largest. Several homes sustained damaged along with dozens of vehicles sustaining substantial hail damage from dents or broken windshields.

CHICOT COUNTY --- 1.0 W DERMOTT MUNI ARPT [33.48, -91.45], 0.6 NNW DERMOTT MUNI ARPT [33.49, -91.43]

| | | |
|--------------------|---|--------------------------------------|
| 02/05/08 16:04 CST | 0 | Tornado (EF0, L: 1.10 mi , W: 50 yd) |
| 02/05/08 16:05 CST | 0 | Source: Public |

This tornado was viewed as it touched down between Wallace Road and the Airport. It was brief but while on the ground it downed a couple trees across Highway 165. It then proceeded into and open field east of Highway 165 before it dissipated.

CHICOT COUNTY --- 1.7 E HALLEY JCT [33.53, -91.35]

| | | |
|--------------------|---|------------------------------|
| 02/05/08 16:11 CST | 0 | Thunderstorm Wind (EG 55 kt) |
| 02/05/08 16:11 CST | 0 | Source: Emergency Manager |

Two trees were uprooted on Black Pond Road in the Halley Community.

Storm Data and Unusual Weather Phenomena - February 2008

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|----------|-----------|-------------------|---------------------|------------------------|
|----------|-----------|-------------------|---------------------|------------------------|

An outbreak of severe thunderstorms and tornadoes occurred on "Super" Tuesday February 5th 2008. The worst tornadoes and majority of the severe weather occurred to the north of our service area. However, our region did receive quite of a bit of weather with several weak tornadoes, large hail, and wind damage. The worst storm in the Jackson, MS service area was a supercell thunderstorm which tracked across southeast Arkansas and northwest Mississippi. This storm produced several weak tornadoes, but will be know for the very large hail and damage it produced. Hail between baseball and softball size occurred during some of its life with golf ball size occurring throughout its life. Dozens of vehicles were damaged along the path from the very large hail.

The day was setup by near record high temperatures and a very moist and unstable atmosphere. A potent low pressure system and cold front developed over North Texas early Tuesday. As the area of low pressure deepened and tracked northeast across Central Oklahoma and Northwest Arkansas the combination of unstable air and strong wind shear lead to a tornado and severe weather outbreak across the Southeast US. This was just the first round of severe storms to impact the region. A line of storms developed along a pre-frontal trough early Tuesday evening and quickly moved east across the area through early Wednesday morning bringing with it damaging winds and hail.

This outbreak of severe storms produced a little over 80 tornadoes which were responsible for 56 fatalities and hundreds of injuries across about 9 states. Of those 80 plus tornadoes, 5 were rated EF3 and 5 more rated EF4. The longest tornado occurred in north-central Arkansas and was on the ground for 123 miles and was rated and EF4. This was the longest single tornado track recorded in Arkansas since detailed reporting began in 1950.

ASHLEY COUNTY --- 3.3 NNW WEST CROSSETT [33.17, -92.00], 2.3 SSE OLD MILO [33.25, -91.90]

| | | |
|--------------------|---|-------------------------|
| 02/21/08 22:13 CST | 0 | Hail (0.75 in) |
| 02/21/08 22:24 CST | 0 | Source: Law Enforcement |

One lone thunderstorm moved across a portion of Ashley County and produced some hail. The majority of the thunderstorms, severe weather, and heavy rain fell across central and southern Mississippi.

LOUISIANA, Northeast

MOREHOUSE COUNTY --- 8.7 W STEVENSON [32.92, -92.08], 6.7 NW NAFF [33.01, -91.99]

| | | |
|--------------------|---|-------------------|
| 02/05/08 15:00 CST | 0 | Hail (1.00 in) |
| 02/05/08 15:07 CST | 0 | Source: Newspaper |

FRANKLIN COUNTY --- 4.5 NE BASKIN [32.31, -91.69]

| | | |
|--------------------|-----|------------------------------|
| 02/05/08 21:56 CST | 10K | Thunderstorm Wind (EG 58 kt) |
| 02/05/08 21:56 CST | 0 | Source: Utility Company |

A few power lines were blown down.

EAST CARROLL COUNTY --- 6.7 WSW TRANSYLVANIA ARPT [32.65, -91.33]

| | | |
|--------------------|---|-------------------------|
| 02/05/08 22:45 CST | 0 | Funnel Cloud |
| 02/05/08 22:45 CST | 0 | Source: Trained Spotter |

CATAHOULA COUNTY --- 3.9 NNE HARRISONBURG [31.82, -91.82]

| | | |
|--------------------|---|------------------------------|
| 02/05/08 22:52 CST | 0 | Thunderstorm Wind (EG 55 kt) |
| 02/05/08 22:52 CST | 0 | Source: Public |

Several trees were blown down just north of Harrisonburg.

CATAHOULA COUNTY --- 1.3 NE WALTERS [31.56, -91.98], 0.6 SE ARCHIE [31.57, -91.96]

| | | |
|--------------------|----|--------------------------------------|
| 02/05/08 23:17 CST | 2K | Tornado (EF0, L: 1.47 mi , W: 50 yd) |
| 02/05/08 23:18 CST | 0 | Source: NWS Storm Survey |

This weak tornado tore some tin off a barn and scattered the tin across a field with one piece thrown in a tree. Numerous limbs were also blown down. Maximum winds were around 75 mph.

CATAHOULA COUNTY --- 0.3 W TRINITY [31.63, -91.83]

| | | |
|--------------------|-----|------------------------------|
| 02/05/08 23:25 CST | 25K | Thunderstorm Wind (EG 60 kt) |
| 02/05/08 23:25 CST | 0 | Source: Utility Company |

A few power poles and numerous large limbs were blown down in the Jonesville area.

| | | | |
|--|--------------------|-----|------------------------------|
| CATAHOULA COUNTY --- 1.2 E LARTO [31.37, -91.90], 0.7 E GLADE [31.50, -91.86] | 02/12/08 11:22 CST | 80K | Thunderstorm Wind (EG 70 kt) |
| | 02/12/08 11:30 CST | 0 | Source: Public |

Numerous trees and power lines were blown down around Larto and the Pharms Communities. Minor damage also occurred to a couple homes where some tin was torn off a few roofs.

| | | | |
|---|--------------------|-----|------------------------------|
| CONCORDIA COUNTY --- DEER PARK [31.42, -91.58] | 02/12/08 11:40 CST | 65K | Thunderstorm Wind (EG 70 kt) |
| | 02/12/08 11:42 CST | 0 | Source: Emergency Manager |

Several trees were blown down around the Deer Park Community. Four mobile homes were damaged, some by fallen trees and the others had their porches blown off.

A potent storm system dropped out of the Southern Plains on February 12th and pushed a squall line of thunderstorms through the region. This squall line produced widespread wind damage across portions of northeast Louisiana as well as central and southern Mississippi. The line of storms was very efficient in terms of producing severe wind gusts, many of which were between 75 and 90 mph. Thousands of trees were damaged with many falling on homes and taking down power lines. Five brief tornadoes also occurred with this line of storms.

| | | | |
|---|--------------------|-----|------------------------------|
| CONCORDIA COUNTY --- 1.5 SSW DEER PARK [31.40, -91.59] | 02/17/08 01:50 CST | 10K | Thunderstorm Wind (EG 55 kt) |
| | 02/17/08 01:50 CST | 0 | Source: Utility Company |

A few trees were blown down on power lines.

During the early morning hours of February 17th, the southern half of the area saw a line of showers and thunderstorms move through. This line brought gusty winds to many areas with scattered severe thunderstorms across the Highway 84 corridor. Scattered wind

This weak tornado touched down just east of Rosedale and traveled for about three miles to just northwest of the Malvina Community. A few trees were uprooted and one mobile home had the roof removed. A large gas storage tank was rolled over in the area as well.

A highway sign was snapped along Highway 61 along with large limbs blown onto a garage.

A few trees and power lines were blown down from Gunnison to Duncan.

Numerous large trees and power lines were blown down in eastern Warren County.

A swath of quarter to golf ball sized hail fell across eastern Warren County.

A few large trees blown down off Higgins Road.

This tornado started about 9 miles south southeast of Benton in the Myrleville community. Along the path, two grain bins destroyed, a tractor trailer was blown on its side, metal roofing was peeled off of a home, and power poles were blown down off Berryville Road.

A large pine tree was blown down and power pole snapped.

Numerous large limbs were blown down along Highway 548 near Shelby Road.

A few trees were blown down on Highway 511 and on county road 310.

An outbreak of severe thunderstorms and tornadoes occurred on "Super" Tuesday February 5th 2008. The worst tornadoes and majority of the severe weather occurred to the north of our service area. However, our region did receive quite of a bit of weather with several weak tornadoes, large hail, and wind damage. The worst storm in the Jackson, MS service area was a supercell thunderstorm which tracked across southeast Arkansas and northwest Mississippi. This storm produced several weak tornadoes, but will be know for the very large hail and damage it produced. Hail between baseball and softball size occurred during some of its life with golf ball size occurring throughout its life. Dozens of vehicles were damaged along the path from the very large hail.

The day was setup by near record high temperatures and a very moist and unstable atmosphere. A potent low pressure system and cold front developed over North Texas early Tuesday. As the area of low pressure deepened and tracked northeast across Central Oklahoma and Northwest Arkansas the combination of unstable air and strong wind shear lead to a tornado and severe weather outbreak across the Southeast US. This was just the first round of severe storms to impact the region. A line of storms developed along a pre-frontal trough early Tuesday evening and quickly moved east across the area through early Wednesday morning bringing with it damaging winds and hail.

This outbreak of severe storms produced a little over 80 tornadoes which were responsible for 56 fatalities and hundreds of injuries across about 9 states. Of those 80 plus tornadoes, 5 were rated EF3 and 5 more rated EF4. The longest tornado occurred in north-central Arkansas and was on the ground for 123 miles and was rated and EF4. This was the longest single tornado track recorded in Arkansas since detailed reporting began in 1950.

This tornado touched down near Trustmark Park and traveled east-southeast for almost 3.5 miles. Near the ballpark, several trees were snapped and construction material was blown some distance. Between the ballpark and Pearson Road, many trees were snapped and shingle damage occurred to several homes. The tornado then crossed Pearson Road, causing roof damage to several businesses and snapping trees and large limbs. The tornado then moved across Pine Park, Patton Place, and McLaurin Heights subdivisions. A number of homes in those areas suffered significant loss of roofing material, several outbuildings were heavily damaged or destroyed, and a number of large trees were snapped or uprooted. The tornado then crossed Interstate 20, continuing to snap or uproot a number of trees, before dissipating just southeast of the highway. Maximum winds were around 95 mph.

A very intense downburst occurred across a good portion of central Rankin County, generally covering areas from the east side of Pearl through the south side of Brandon to areas just southeast of Brandon. This downburst occurred just after the EF1 tornado moved through the heart of Pearl. The wind damage began on the southeast portion of Pearl, generally between Interstate 20, Highway 475 and Highway 468. Numerous trees were blown down and a large portion of a wooden fence was blown down at an auto salvage. The swath of wind damage continued to the east toward the western side of Brandon where Interstate 20 intersects with Crossgates Blvd. Here, significant wind damage occurred as numerous trees were uprooted and snapped, dozens of homes were suffered shingle damage off Greenfield Road. The Honda Auto Dealer lost several signs and had a few dozen cars damaged. Several power poles were taken down at this location as well. An apartment complex suffered substantial shingle damage to nearly all units. Winds were the most intense in this area and were estimated around 100 mph. The damaging winds continued across the southern half of Brandon where several hundred trees were uprooted or snapped. Several power lines were taken down by fallen trees along with about 6 homes damaged from downed trees. Nearly all the damage occurred between Interstate 20 and the new Highway 18.

Storm Data and Unusual Weather Phenomena - February 2008

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|--|--------------------|-------------------|---------------------|------------------------------|
| <p>An intense and long lived downburst occurred across all of northern Smith County. The majority of the damage occurred between Highway 18, Polkville, Burns and Pineville. A few hundred trees were uprooted and snapped with nearly two dozen across roads. Several power lines were also taken down by trees. Some of the most intense damage occurred between Burns and Raleigh where numerous trees were snapped and uprooted. Another area of enhanced damage was across the eastern portion of the county along Bailey Road and Highway 501. Most of the wind gusts associated with the large swath of damage was around 80 to 90 mph. However, the areas of enhanced damage likely had maximum wind gusts around 100 mph.</p> | | | | |

| Several trees were blown down on a farm. | | | | |
| <p>A potent storm system dropped out of the Southern Plains on February 12th and pushed a squall line of thunderstorms through the region. This squall line produced widespread wind damage across portions of northeast Louisiana as well as central and southern Mississippi. The line of storms was very efficient in terms of producing severe wind gusts, many of which were between 75 and 90 mph. Thousands of trees were damaged with many falling on homes and taking down power lines. Five brief tornadoes also occurred with this line of storms.</p> | | | | |

| <p>Another round of thunderstorms and heavy rain caused additional flooding across west and northwest portions of Lincoln County. A few creeks were out of their banks, especially McCall Creek, and water was over several roads as well as the bridge across McCall Creek Road. Total rainfall from the event ranged between 4 and 6 inches.</p> | | | | |

Storm Data and Unusual Weather Phenomena - February 2008

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|----------|-----------|-------------------|---------------------|------------------------|
|----------|-----------|-------------------|---------------------|------------------------|

The 20th and 21st of February brought a round of locally heavy rainfall to the Interstate 20 corridor during the mid morning, then activity shifted to severe weather by afternoon and evening. Numerous severe thunderstorms occurred across central and southern sections of the area which brought large hail and damaging winds to many locations. The severe weather eventually evolved into heavy rain and flash flooding across central sections of the area as thunderstorms repeatedly moved over the same locations.

ATTALA COUNTY --- 2.4 WSW HESTERVILLE [33.16, -89.71], 6.6 N ETHEL [33.22, -89.48]

| | | |
|--------------------|---|---------------------------|
| 02/26/08 01:33 CST | 0 | Hail (0.75 in) |
| 02/26/08 01:46 CST | 0 | Source: Emergency Manager |

A swath of penny sized hail fell across the northern portion of Attala County.

SIMPSON COUNTY --- 2.8 S HARRISVILLE [31.93, -90.08], 3.5 W MENDENHALL [31.95, -89.94]

| | | |
|--------------------|---|----------------|
| 02/26/08 03:23 CST | 0 | Hail (1.75 in) |
| 02/26/08 03:33 CST | 0 | Source: Public |

An area of quarter to golf ball sized hail fell across a portion of north central Simpson County.

SMITH COUNTY --- 1.1 W MIZE [31.87, -89.57], 0.5 E MIZE [31.87, -89.54]

| | | |
|--------------------|---|----------------|
| 02/26/08 04:10 CST | 0 | Hail (0.88 in) |
| 02/26/08 04:12 CST | 0 | Source: Public |

Dime to nickel sized hail occurred around Mize.

JASPER COUNTY --- 2.6 SSE BAY SPGS [31.93, -89.29]

| | | |
|--------------------|---|---------------------------|
| 02/26/08 04:20 CST | 0 | Hail (0.75 in) |
| 02/26/08 04:20 CST | 0 | Source: Emergency Manager |

Penny sized hail around Bay Springs.

During the early morning hours of February 26th, a line of thunderstorms move east southeast across the region. Scattered severe thunderstorms developed along this line as it approached the Natchez Trace corridor. A handful of hail reports occurred with certain segments of this line along with a few wind damage reports.
